The Ardour Global IndexSM (Extra Liquid) (TICKER: AGIXL), which contains a fixed number of 30 stocks, had one addition against one deletion. Power Integrations Inc. (TICKER: POWI US) will replace SolarWorld AG (TICKER: SWV GR).

A complete list of constituents and weights will be posted on the AGI family of alternative energy indexes website (http://ardour.snetglobalindexes.com/about_the_indexes.php) as of the effective date.

The Ardour Global Alternative Energy IndexSM is a capitalization-weighted, float-adjusted index of the most prominent alternative energy stocks in the world. To be included in the AGIGL index, companies must be pure-play and the stocks must pass multiple screens, including for capitalization, float, exchange listing, share price and turnover.

The Index Committee today announced a change in index methodology relating to "Index Constituents" in the AGIXL as follows: companies representing at least 90% of the total weight of the respective indexes must have turnover of at least USD 1 million per day for the three months preceding the last trading date of the second month of each calendar quarter. Pre-existing index constituents with share turnover of less than 600,000 USD average daily trading volume shall be deleted from the index. This rule change will go into effect immediately.
